## PNEUMATIC CARRIERS

We offer a complete line of drive-up carriers. These carriers will fit all drive-up units available. They come in various sizes, colors, and either side opening or end opening. We can provide you a carrier to fit your needs at a good price, long life, and with prompt delivery.

### SIDE OPENING CARRIERS

Our carriers come in clear and colored bodies plus 14 different colored end caps to provide you with many different combinations for multiple lane situations.

### END OPENING CARRIERS

All carriers come with color or number decals enclosed for lane designation. Back up carriers can be stocked without regard to color because the enclosed color decals are affected by the teller. This is a convenient and low cost way of having a back-up stock to avoid running out of carriers and having to shut down a drive-up lane. You will also avoid the time and delay of having to order and wait for a new carrier to arrive.

### 4.5" PHARMACY CARRIER

Our pharmacy carrier was designed for use on a 4.5" pneumatic tube systems. These systems are for drive-up pharmacies. The carrier has a large capacity which will accommodate the standard blister pack pharmaceuticals.
